The idea

Not just food.

We undertook this project with the promise
not to alter the place that hosts us.

For this reason, everything has been designed for sustainable and responsible management, so we ask for your **understanding and cooperation** in waste management, sorting and disposal.

The lunch is also a form of local involvement; shepherds and operators in the name of community and local economy to try to promote a positive impact on the territory.

The food

Solutions for all tastes.

The food is **all local** and prepared by **Azienda Agricola 'I Balzi'** located just above Canyon Park in the charming village of Casoli. The cheeses are from the shepherds of Lucchio and the bread is 'homemade' with various types of traditional flours.

Particular attention has been paid to the choice of **ingredients and foodstuffs**, giving due value also to **vegetarian** and **vegan** solutions.

Each product bears the name of a locality in the area, no fancy names!

THE BEST LOCAL PRODUCTS!

How it works

A Canyon Park-style 'delivery

- 1. Ordina a questo link:**
(by the day before the activity, not on the day itself)
[ZIP LUNCH](#)
- 2. Choose the delivery date in Canyon Park**
(which coincides with the date of the park experience).
The time is fixed at 13/13:30 for all deliveries.
- 3. Pay online**
(NB: payment is made to the Azienda Agricola i Balzi which prepares and packs the lunches)
- 4. Collect**
Between 13:00 and 13:30 the baskets arrive by cable car at the INmind Forest and will be prepared for collection at a **Pick-up Point**.

Each basket bears the name under which the order was placed. Signs with ZIP Lunch signs will provide information on **how to reach the pick-up point**.
- 5. Eat!**
It is possible to eat lunch anywhere except in hammocks.

Waste

LET'S RESPECT NATURE!

Your cooperation is requested!

At the INmind Forest there are no waste bins, by choice. In fact, everyone is responsible for keeping and disposing of their own waste, **taking the bag provided to the bins at the entrance to Canyon Park**, just before the old Black Bridge. No plastic is used and we only use recyclable materials.

We ask you to please differentiate organic or compostable waste from glass. It is very important. Then we take care of it.
